morrifield tunnel houses

"The Tunnel house all other Tunnel houses are talking about!"

Morrifield has been producing high quality tunnelhouses for the New Zealand market since 1980. Designed and built in Southland, Morrifield Tunnelhouses extend your growing season and are proven to with-stand New Zealand's harsh weather conditions including snow, hail & high winds.

Why choose a Morrifield Greenhouse?

- New Zealand's original tunnelhouse manufacturer since 1980! Strong construction that resists all weather conditions
- Long life anodised aluminium frames requires no barrier tape
- Plant earlier, harvest for longer and stay out of the wind & rain!
- Tanalised timber bases included (Macrocarpa available on request)
- Grow your own fruit & vegetables all year round. Healthier, fresher, chemical free
- Pre-fabricated cover requires no clipping to the arches
- New Zealand's strongest tunnelhouse, using the same proven design since 1980
- Second-to-none after-sales service & back-up
- New Zealand's easiest tunnelhouse to construct, guaranteed

twinwall greenhouses

"The Greenhouse all other Greenhouses are talking about!"

polycarbonate

We believe at Morrifield that this is New Zealand's strongest green house.

A very attractive model, available in a range of sizes to suit all gardens. Delivered partially assembled for easy installation, the 6mm twinwall sheeting is strong, durable and provides a double glazing effect to better retain heat & extend your growing season. Full length roof vents and mesh doors as standard allow for excellent ventilation. Extremely durable and proven to stand up to New Zealand's strongest winds.

- New Zealand's only greenhouse designed for twinwall polycarbonate, not a modified glasshouse
- Quality 6mm polycarbonate has a 15 year U.V. warranty
- Full length roof vents & screen doors as standard
- New Zealand's strongest greenhouse.
- Grow your own fruit & vegetables all year round. Healthier, fresher, chemical free
- Designed and manufactured entirely in Southland since 1980
- Curved sheeting design gives maximum strength
- Less framing means less shading = more available light to promote plant growth
