

Morrifield

Greenhouses

Caring for your Morrifield Tunnelhouse

- Hose down with water to remove any dust/dirt.
- Use warm soapy water, preferably a biodegradable detergent, dishwasher is fine.
- Use a soft bristle brush, a nylon house broom or similar is perfect, if you have one.
- Once you have cleaned it make sure you rinse off soap thoroughly.
- It is important to do this once a year, a good time to do this is when you are at the end of your harvest and getting ready for your next season.
- Keeping your cover clean, will ensure good light transparency and will help with the growth of your plants.
- Clean your cover yearly to prevent dirt build up.
- We hope you and your “Morrifield “ have many successful growing seasons together!
