

CARING FOR YOUR MORRIFIELD TUNNELHOUSE

- **Hose down with water to remove any dust/dirt.**
- **Use a bucket of warm soapy water, preferably a biodegradable detergent, dishwash liquid is fine.**
- **Use a soft bristle brush to scrub the inside & outside of the cover, we recommend a nylon house broom or a car brush.**
- **Once you finished cleaning, please ensure that you rinse off the soap thoroughly.**

It is important to do this once a year, a good time to do this is when you are at the end of your harvest and getting ready for your next season.

Keeping your cover clean, will ensure the longevity of your cover, ensure good light transparency and will help with the growth of your plants.

**CLEAN YOUR TUNNELHOUSE YEARLY TO PREVENT DIRT
BUILD UP**

***We hope you and your “Morrifield” have many
successful growing seasons together!***
